

- Order Flow Algorithms
- 2 SD Tick Ratio
- Sweep 1,2
- Big Book Pressure
- Engulfing Sweep at End on FlexRenko larger scale chart
- No Book Pressure (A few bars with no BP prints...the book has been emptied)

- Big Book Pressure
- Engulfing Sweep on Pivot Low
- Sweep, 1,2
- Tip - Engulfing Sweep.Down[1] on FlexRenko chart
- **Human Starts Here – SceetoBots Price Momentum study = At least n ticks (3 Tick Range Bar in ES – Need at least 11-12 ticks)**
- If all of the above except Price Momentum >10 ticks
 - → then look to go short on breach of Low.
 - - Recommendation – USE AUDIO ALERTS –

- If everything has lined up, then turn on **Order Flow with Pivot Bot**
- Engulfing Sweep
- Big Book Pressure
- Sweep 1,2
- 2 SD TR (Which you don't get much)
- Deployed SceetoBot will only trade if trade conditions are met.
- SceetoBot can self-terminate if instructed to.

- If Phase 03 is successful, Human can assess whether to deploy another bot or stand down and wait for the next Momentum Alert.
- Apply Breach Bot – Long
- Deploy Order Flow w.Pivot bot depending upon level of market momentum
- If Phase 03 is not successful, then human can make a determination to deploy a bot that trades in the opposite direction, or to stand down and wait for next Momentum alert.
- Apply Breach Bot – Short
- If Phase 03 is not successful, a reversal trade will likely get you back to even, and/or, a profit if you are trading lots in multiples of 3 and scaling out.

Do Not Trade in Chop → Use the Momentum Alert as a pre-condition to trade.
Trade Management → Enter lots divisible by 3 (e.g. – 3 contracts, or 9 contracts, etc.).

The Conclusionary Selling at '1' may be followed by another minor low.
The 'Tell' is the Price Excursion → The excursion tells you that price is responded to order flow.

Questions to be answered for every trade:

- Where was the last Conclusionary?
- Where are my Breach Lines?
 - Are they relevant?
- **For Long Trades** - What does this trade look like long?
 - What does a failure of the long trade look like?
- **For Short Trades** - What does this trade look like short?
 - What does a failure of this trade look like?
